

1" STAINLESS STEEL SHOWER ROD (-Specify length)

Part number shall be _____

#112=60"

#112A=72"

CONSTRUCTION: 1" x .015 (28ga) x 60" or 72" #430 roll formed bright polished stainless steel.

OPERATION: The stainless steel shower rod is designed to be used when the specification calls for a light gauge stainless steel rod to support a shower curtain.

INSTALLATION: In order to mount the shower rod, it is necessary to use a pair of shower rod flanges to secure the rod in place. Order flanges separately.

SPECIFICATION: The #112 or #112A shower rod is constructed of #430 roll formed bright polished stainless steel and shall be of .015 (28gauge) thickness.
