

1" STAINLESS STEEL SHOWER ROD

(-Specify length)

Part number shall be _____

#114=60"

#114A=72"

CONSTRUCTION: 1" x .049 (18ga) x 60" or 72" #304 satin finish stainless steel.

OPERATION: The stainless steel shower rod is designed to be used when the specification calls for a heavy gauge stainless steel rod to support a shower curtain.

INSTALLATION: In order to mount the shower rod, it is necessary to use a pair of shower rod flanges to secure the rod in place. Order flanges separately.

SPECIFICATION: The #114(60") or #114A(72") shower rod is constructed of #304 satin finish stainless steel and shall be of .049 (18gauge) thickness.

Available in: 60" (#114) or 72" (#114A)
