

1 1/4" STAINLESS STEEL SHOWER ROD

(-Specify length)

Part number shall be _____

#115=60"

#115A=72"

CONSTRUCTION: 1 1/4" x .049 (18ga) x 60" or 72" #304 satin finish stainless steel.

OPERATION: The stainless steel shower rod is designed to be used when the specification calls for a heavy gauge stainless steel rod to support a shower curtain.

INSTALLATION: In order to mount the shower rod, it is necessary to use a pair of shower rod flanges to secure the rod in place. Order flanges separately.

SPECIFICATION: The #115(60") or #115A(72") shower rod is constructed of #304 satin finish stainless steel and shall be of .049 (18gauge) thickness.

Available in 60" (#115) or 72" (#115A)
