

1" STAINLESS STEEL SHOWER ROD

(-Specify length)

Part number shall be _____

#113=60"

#113A=72"

CONSTRUCTION: 1" x .035 (20ga) x 60" or 72" #304 bright polished and buffed stainless steel.

OPERATION: The stainless steel shower rod is designed to be used when the specification calls for a medium gauge stainless steel rod to support a shower curtain.

INSTALLATION: In order to mount the shower rod, it is necessary to use a pair of shower rod flanges to secure the rod in place. Order flanges separately.

SPECIFICATION: The #113(60") or #113A(72") shower rod is constructed of #304 bright polished stainless steel and shall be of .035 (20gauge) thickness.

Available in 60" (#113) or 72" (#113A)
